As a Flutter Developer, I have successfully designed, developed, and implemented various mobile applications with a focus on e-commerce, market monitoring, and health-related functionalities.

E-commerce App Development:

Developed an e-commerce application that featured social logins with Facebook, Google, and WhatsApp (OTPlless login) for enhanced user convenience.
Integrated Apple Sign-In for iOS users, ensuring a seamless authentication process.
Implemented Geolocation Services using Google Maps to provide location-based features and services.
Incorporated design changes to enhance the overall user experience and interface.

Live Market App:
Spearheaded the development of a comprehensive risk assessment tool for evaluating forex exposure, catering to the financial market needs.
Implemented real-time market monitoring features to provide up-to-date information to users.
Utilized Flutter's provider package for state management and seamless data handling.
Integrated push notifications to keep users informed about critical market events.
Utilized various APIs to fetch and display market data in real-time.

Health App:
Created a health app from scratch using the Bloc pattern for efficient state management.
Integrated push notifications to remind users of their health-related tasks and appointments. |

Implemented various APIs to fetch health-related information and display it within the app.
Utilized Flutter packages to incorporate animations, enhancing the app's visual appeal.

Villa Booking Project:

Developed a villa booking application using the provider pattern and integrated APIs for seamless functionality.

App Deployment:

Successfully published all the above applications to both Google Play Store and Apple App Store, ensuring widespread availability and accessibility to users.
