EXPERIENCE

FEB 2023 – PRESENT

Software Development Engineer- Startup Labs Infotech Pvt. Ltd- Jaipur, India

- Implemented betting games featuring Lottie animations and live data integration via WebSocket technology.
- Integrated React CMS Solution with APIs for seamless content management and data retrieval.
- Designed layouts in React Native and seamlessly integrated authenticated APIs for enhanced functionality within mobile applications. Additionally, utilized React Js to develop dynamic web applications.

EDUCATION

MCA - Shankara Institute of Technology [2023-25]
B.Sc - Maharani's College, Jaipur [2017-20]
12th - K.M.D Public Sr. Sec. School [2015-16]
10th - K.M.D Public Sr. Sec. School [2013-14]

INTERNSHIP

Front End Intern at Learn4o (L4o) Technology Pvt. Ltd. [Apr, 2022- Nov, 2022]
1. Acquired proficiency in coding and problem-solving techniques through the utilization of arrays, conditionals, and loops.
2. Mastered HTML, CSS, and JavaScript to develop responsive websites tailored to various screen sizes and devices.
3. Expanded skillset by delving into ReactJS for constructing dynamic User Interfaces, employing React hooks for efficient state management, exploring React-Router-Dom for seamless navigation across multiple pages, and gaining proficiency in API integration.

CERTIFICATION

- Certificate of FRONT-END DEVELOPMENT course with REACT.
- Rajasthan State Certificate in Information Technology.

PROJECTS

Shergames (React Js)

1. Created engaging user interfaces for betting games using React, coupled with authenticated API integration to bolster security and elevate user experience.

2. Employed WebSocket technology to seamlessly retrieve and display real-time data within the gaming environment.

3. Implemented intelligent game logic and advanced data manipulation techniques to optimize user engagement and enhance overall enjoyment.

4. Leveraged iframes and post messages for seamless integration of external content, fostering a dynamic user interface.

5. Utilized Lottie animations to elevate the visual appeal of the games, making them more visually captivating and interactive.

No Code Website Builder (React Js)

1. Developed a Content Management System (CMS) capable of generating websites with a variety of templates.

2. Collaborated on the frontend server to seamlessly integrate authenticated APIs, including Payment Integration with React (specifically Razor Pay), and facilitated website downloads through API usage, employing React-Query for efficient asynchronous data fetching and state management.

Prana Shuddhi (React Native)

1. Developed a React Native application featuring functionalities such as feeds, an e-commerce cart, and gated content accessible through paywalls.

2. Seamlessly integrated authenticated APIs within the application, including features like SignUp, SignIn, SignUp via phone number and OTP, as well as functionalities for sharing, liking, and disliking posts, and facilitating user logout.

3. Implemented state management utilizing the context API to efficiently manage application-wide state and enhance user experience.

React Js Project (crypto-currency)

Created a cryptocurrency website by integrating APIs through the Axios library, and employed React Hooks for efficient state management, utilizing functions like useState(), useEffect(), and useParams().

React Js Project (Rent Up Website)

Developed a react multi page website using React Router Dom and React Hooks.
