Objective

Dynamic and creative web developer with over 1.5 years of experience, specializing in designing, implementing, and testing interactive and user-centered websites. Proficient in HTML, CSS, JavaScript, extensively skilled in React, and experienced with WordPress. Committed to building responsive and accessible web applications that provide excellent user experiences.

Skills

Languages: HTML5, CSS3, JavaScript (ES6+), SQL, PHP

Frameworks/Libraries: React, jQuery

CMS: WordPress

Databases: MySQL, Firebase

Professional Experience

Freelance Web Developer

Self-Employed, Jaipur

Design and develop websites and applications focusing primarily on front-end functionalities using React.

Ensure optimized performance on mobile devices.

Maintain client relationships, offering ongoing support and updates post-launch.

Intern Web Developer

Cosmic Technoplast, Gurgaon

March 27, 2023 – October 27, 2023

Developed and enhanced front-end components primarily using React.

Collaborated with senior developers in the creation of rich, interactive user experiences.

Participated actively in project planning, code reviews, and troubleshooting sessions.

Education

Bachelor in Computer Application (BCA)

Rajasthan University, Jaipur

Graduated in 2023

Projects

- **E-commerce Website**

Developed a customer-facing front-end for an e-commerce platform using React, incorporating features such as dynamic product listings and interactive user accounts.

Utilized Firebase for backend data handling, authentication, and storage solutions to manage a seamless user experience and secure transaction processing.

- **Portfolio Website [Link](#)**

Created a personal portfolio website to showcase projects and skills, focusing on responsive design and React-based interactive elements.
